

# SATELLITE EVENTS

## PROGRAMME AT A GLANCE

Saturday, 19 August 2023	Sunday, 20 August 2023	
Full day	Morning	Afternoon
	The Wheat Initiative	
OMGN: Oomycete Molecular Genetics Network Annual Meeting		
Biological induced resistance in plants against pathogens using beneficial microbes and natural substances		
How to combine remote sensing with epidemiological modelling to improve plant disease management?		
Pectobacteriaceae: soft rot pathogenesis and symbiosis		
ISPP Executive Committee (private event)	Powdery mildews: phylogenetics, phylogenomics, and molecular host-pathogen interactions	
5 <sup>th</sup> EURL Bacteriology workshop (private event)	4 <sup>th</sup> European Conference on Xylella fastidiosa	
Fusarium wilt disease of banana: how to tackle a pandemic?	Harnessing Culture Collections for Improved Plant Health	Phytobiomes Research for Plant Health
Plant Health starts with Seed Health	Rice diseases	
Forest pathology field trip	High-throughput sequencing in plant virology: from discovery to diagnostics	
	Understanding the ecology and evolution of bacterial wilt disease in the plant microbiomes	
	How to Write Winning Grant Proposals	Tn-Seq to reveal microbial lifestyles along plant interaction processes
	Global Plant Health Assessment Workshop
